

SANTIAGO NAVARRO

Santiago

Born in Alicante in 1980. He studied in the prestigious Art School 10 in Madrid.

His art moves away from traditional painting techniques, instead he uses an exciting new vibrant method in his art. It is a unique 3D effect, with spots of colour and film-like plastic figures.

These figures form crowds which have become the recurring theme in his work. Navarro's work expresses the dynamic energy of society through these small static figures.

He is a highly sought-after artist and has exhibited in prestigious galleries in Spain, Paris, Milano and the USA.
