

## BERTA SOLANA

Born in Madrid, Spain in 1976, she has a Master's Degree in Art History, by the Complutense University of Madrid (UCM), she also studied with an Erasmus Grant at the Vrije Universiteit of Amsterdam, Holland.

Her work is a balance combination between the abstraction of the base and the figurative representation in first scenes. The human figure is the undeniable protagonist and it makes it more powerful all the abstract set of shades used in her paintings.

The artist reproduces family moments, from close relatives, in which is easy to feel identified with. The fact that she paints them aside or from behind, and with no possibility to see the faces, makes us that our wish to get along with the pieces is bigger, as we feel them like ours.

In her colour range you can find calm and peaceful feelings, with an inspiration for the vacational and family moments. In her painting, the warm colors prevail but not so much the cold colors, creating cool scenes.
